OBJECTIVE

I am graduating this June 2023 with my bachelor's and I'm seeking my breakthrough position in the software industry. Eager to apply my skills and drive to start my career. I'm an efficient learner who values and understands the importance of teamwork and communication.

WORK EXPERIENCE

Software Developer (Capstone)

Dirty2Dreamy

📅 Feb 2023 - current

- Working with the client to plan and design a custom software solution for the auto detailing industry. (Quote Calculation System)
- Developing full-stack application using (React, Node.js, Express, MongoDB).
- Application provides customers with an interactive experience to get a quote for their detail and allows companies to view and contact those customers.

Software Developer (Client school project)

Neurian

📅 Sept 2022 – Dec 2022

- Developing software status report system for Neurian's engineers and clients
- Worked in an agile Development team, having daily standups, and using a Kanban board system.
- Full-stack development, using (React, Node, GraphQL, MongoDB, and Typescript)

Web Development Intern

Green River College

📅 Mar 2022 – June 2022

- Worked on many applications in an agile development team.
- Full-stack development, using (PHP, MySQL, Javascript, Bootstrap, MVC PHP framework, HTML, CSS).
- Presented bug fixes/any new features to all stakeholders at the end of the quarter.
